

KEY INSTANT RECALL FACTS

To develop your child's fluency and mental maths skills, we have decided to introduce KIRFs (Key Instant Recall Facts) throughout school.

KIRFS are a way of helping your child to learn by heart, key facts and information which they need to have instant recall of. KIRFs are a crucial part of a child's learning journey. They underpin a learner's mental development and ensure that they're able to answer maths questions with confidence.

They are particularly useful when calculating: adding; subtracting; multiplying or dividing. They contain number facts such as number bonds and times tables that need constant practice and rehearsal, so children can recall them quickly and accurately. Instant recall of facts helps enormously with mental agility within maths lessons. When children move onto written calculations, knowing these key facts is very beneficial.

For your child to become more efficient in recalling them easily, they need to be practised frequently and for short periods of time. Each half term, children will focus on a Key Instant Recall Fact (KIRF) to practise and learn at home for the half term. They will also be available on our school website under the maths section. The KIRFs include practical ideas to assist your child in grasping the key facts and contain helpful suggestions of ways in which you could make this learning interesting and relevant.

They are not designed to be a time-consuming task and can be practiced anywhere – in the car, walking to school, etc. Regular practice - little and often – helps children to retain these facts and keep their skills sharp. **Throughout the half term, the KIRFs will also be practiced in school and your child's teacher will assess whether they have been retained.**

Over their time at primary school, we believe that - if the KIRFs are developed fully - children will be more confident with number work, understand its relevance, and be able to access the curriculum much more easily.

They will be able to apply what they have learned to a wide range of problems that confront us regularly.

Key Instant Recall Facts

Year 3 – Autumn 1

I can sequence multiples of numbers

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

2, 4, 6, 8, 12, 14, 16, 18, 20, 22, 24

3, 6, 9, 12, 15, 18, 21, 24, 27, 30, 33, 36

4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48

5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, 60

6, 12, 18, 24, 30, 36, 42, 48, 54, 60, 66, 72

8, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96

10, 20, 30, 40, 50, 60, 70, 80, 90, 100, 110, 120

Top Tips

The secret to success is practising **little** and **often**.

Use time wisely. Can you practise these KIRFs while walking to school or during a car journey?

You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

A multiple is the result of when you multiply a number by a whole number (an integer) i.e.

multiples of 5 are 5, 10, 15 etc (1×5 , 2×5 , 3×5 etc).

Your child will see that the multiples of 6 are double the multiples of 3 and the same with the multiples of 5 and 10.

Key Vocabulary

When I am counting in 4's, which number **lies between** 12 and 20?

When I am counting in 5's, which number **lies between** 50 and 60?

Which number is missing from my **sequence**:
6, 12, 18, ...?

Key Instant Recall Facts

Year 3 – Autumn 2

I know the multiplication and division facts for the 4 and 8 times tables

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$1 \times 4 = 4$	$4 \div 1 = 4$	$1 \times 8 = 8$	$8 \div 1 = 8$
$2 \times 4 = 8$	$8 \div 2 = 4$	$2 \times 8 = 16$	$16 \div 2 = 8$
$3 \times 4 = 12$	$12 \div 3 = 4$	$3 \times 8 = 24$	$24 \div 3 = 8$
$4 \times 4 = 16$	$16 \div 4 = 4$	$4 \times 8 = 32$	$32 \div 4 = 8$
$5 \times 4 = 20$	$20 \div 5 = 4$	$5 \times 8 = 40$	$40 \div 5 = 8$
$6 \times 4 = 24$	$24 \div 6 = 4$	$6 \times 8 = 48$	$48 \div 6 = 8$
$7 \times 4 = 28$	$28 \div 7 = 4$	$7 \times 8 = 56$	$56 \div 7 = 8$
$8 \times 4 = 32$	$32 \div 8 = 4$	$8 \times 8 = 64$	$64 \div 8 = 8$
$9 \times 4 = 36$	$36 \div 9 = 4$	$9 \times 8 = 72$	$72 \div 9 = 8$
$10 \times 4 = 40$	$40 \div 10 = 4$	$10 \times 8 = 80$	$80 \div 10 = 8$
$11 \times 4 = 44$	$44 \div 11 = 4$	$11 \times 8 = 88$	$88 \div 11 = 8$
$12 \times 4 = 48$	$48 \div 12 = 4$	$12 \times 8 = 96$	$96 \div 12 = 8$

Top Tips:

The secret to success is practising **little** and **often**. What do you already know? – Your child will already know many of these facts from the 2, 5 and 10 times tables.

Songs and Chants – www.timestables.co.uk
and www.timestables.me.uk

Double and double again – Multiplying a number by 4 is the same as doubling and doubling again. Double 6 is 12 and double 12 is 24, so $6 \times 4 = 24$.

Buy one get three free – If your child knows one fact (e.g. $12 \times 4 = 48$), can they tell you the other three facts in the same fact family?

Key Vocabulary

What is 4 **multiplied by** 6?

What is 8 **times** 4?

What is 24 **divided by** 4?

What is 8 **times** 8?

What is 24 **divided by** 8?

WARNING! – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra. E.g. $3 \times 12 = 36$. The answer to the multiplication is 36, so $36 \div 3 = 12$ and $36 \div 12 = 3$

Key Instant Recall Facts

Year 3 – Spring 1

I know the multiplication and division facts for the 3 and 6 times tables

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$1 \times 3 = 3$	$3 \div 1 = 3$	$1 \times 6 = 6$	$6 \div 1 = 6$
$2 \times 3 = 6$	$6 \div 2 = 3$	$2 \times 6 = 12$	$12 \div 2 = 6$
$3 \times 3 = 9$	$9 \div 3 = 3$	$3 \times 6 = 18$	$18 \div 3 = 6$
$4 \times 3 = 12$	$12 \div 4 = 3$	$4 \times 6 = 24$	$24 \div 4 = 6$
$5 \times 3 = 15$	$15 \div 5 = 3$	$5 \times 6 = 30$	$30 \div 5 = 6$
$6 \times 3 = 18$	$18 \div 6 = 3$	$6 \times 6 = 36$	$36 \div 6 = 6$
$7 \times 3 = 21$	$21 \div 7 = 3$	$7 \times 6 = 42$	$42 \div 7 = 6$
$8 \times 3 = 24$	$24 \div 8 = 3$	$8 \times 6 = 48$	$48 \div 8 = 6$
$9 \times 3 = 27$	$27 \div 9 = 3$	$9 \times 6 = 54$	$54 \div 9 = 6$
$10 \times 3 = 30$	$30 \div 10 = 3$	$10 \times 6 = 60$	$60 \div 10 = 6$
$11 \times 3 = 33$	$33 \div 11 = 3$	$11 \times 6 = 66$	$66 \div 11 = 6$
$12 \times 3 = 36$	$33 \div 12 = 3$	$12 \times 6 = 72$	$72 \div 12 = 6$

Top Tips:

The secret to success is practising **little** and **often**. What do you already know? – Your child will already know many of these facts from the 2, 5, 4, 8 and 10 times tables.

Double your threes – Multiplying a number by 6 is the same as multiplying by 3 then doubling the answer. $7 \times 3 = 21$ and double 21 is 42, so $7 \times 6 = 42$

Buy one get three free – If your child knows one fact (e.g. $3 \times 6 = 18$), can they tell you the other three facts in the same fact family?

Key Vocabulary

What is 4 **multiplied by** 6?

What is 8 **times** 4?

What is 24 **divided by** 4?

What is 8 **times** 8?

What is 24 **divided by** 8?

WARNING! – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra. E.g. $3 \times 12 = 36$. The answer to the multiplication is 36, so $36 \div 3 = 12$ and $36 \div 12 = 3$

Key Instant Recall Facts

Year 3 – Spring 2

I can recall facts about the duration of time

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

There are 60 seconds in a minute.
There are 60 minutes in an hour.
There are 24 hours in a day.
There are 7 days in a week.
There are 12 months in a year.
There are 365 days in a year.
There are 366 days in a leap year.

Number of days in each month

January	31	July	31
February	28/29	August	31
March	31	September	30
April	30	October	31
May	31	November	30
June	30	December	31

Children also need to know the order of the months in a year. They should be able to apply these facts to answer questions such as:

- What day comes after 30th April?
- What day comes before 1st February?

Top Tips

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Use rhymes and memory games – The rhyme, *Thirty days hath September*, can help children remember which months have 30 days. There are poems describing the months of the year in order.

Use calendars – If you have a calendar for the new year, your child could be responsible for recording the birthdays of friends and family members in it. Your child could even make their own calendar.

How long is a minute? – Ask your child to sit with their eyes closed for exactly one minute while you time them. Can they guess the length of a minute? Carry out different activities for one minute. How many times can they jump in sixty seconds?

Key Instant Recall Facts

Year 3 – Summer 1

I can tell the time to the nearest 5 minutes.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Children need to be able to tell the time using a clock with hands.

This target can be broken down into several steps.

- I can tell the time to the nearest hour.
- I can tell the time to the nearest half hour.
- I can tell the time to the nearest quarter hour.
- I can tell the time to the nearest five minutes.

Key Vocabulary

Twelve **o'clock**

Half past two

Quarter past three

Quarter to nine

Five **past** one

Twenty-five **to** ten

Top Tips

The secret to success is practising **little** and **often**. Can you practise these KIRFs while walking to school or during a car journey? If you would like more ideas, please speak to your child's teacher.

Talk about time – Discuss what time things happen. When does your child wake up? What time do they eat breakfast? Make sure that you have an analogue clock visible in your house or that your child wears a watch with hands. Once your child is confident telling the time, see if you can find more challenging clocks e.g. with Roman numerals or no numbers marked.

Ask your child the time regularly – You could also give your child some responsibility for watching the clock:

‘The cakes need to come out of the oven at twenty-five minutes past four exactly.’

‘We need to leave the house at twenty-five to nine.’

Key Instant Recall Facts

Year 3 – Summer 2

I know number bonds to 100.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Some examples:

$60 + 40 = 100$

$40 + 60 = 100$

$100 - 40 = 60$

$100 - 60 = 40$

$75 + 25 = 100$

$25 + 75 = 100$

$100 - 25 = 75$

$100 - 75 = 25$

$37 + 63 = 100$

$63 + 37 = 100$

$100 - 37 = 63$

$100 - 63 = 37$

$48 + 52 = 100$

$52 + 48 = 100$

$100 - 52 = 48$

$100 - 48 = 52$

Key Vocabulary

What do I **add** to 65 to make 100?

What is 100 **take away** 6?

What is 13 **less than** 100?

How many more than 98 is 100?

This list includes some examples of facts that children should know. They should be able to answer questions including missing number questions.

e.g. $49 + \bigcirc = 100$ or $100 - \bigcirc = 72$

Top Tips

The secret to success is practising **little** and **often**. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Buy one get three free – If your child knows one fact (e.g. $85 + 15 = 100$), can they tell you the other three facts in the same fact family?

Use number bonds to 10 – How can your number bonds to 10 help you work out number bonds to 100?
